Korean

## **PROFILE**

UI designer with a chiropractic assistant and receptionist background. Experienced in designing prototypes for design concepts and collaboration work as a team and skilled in building wireframes and user flows.

## **PROJECT**

### **Elejewel App — Focused on User Interface Design**

- Includes research through guiding principles and user flow in the last immersion project with UI elements such as logos, colors, fonts, and styling at the CareerFoundry. The most completed work with great low, mid, and high fidelity came out.

### **Portfolio Site — Made my website with HTML & CSS**

- Knowledge of how to relate UI design and front-end development coding.

## **EDUCATION**

### **CareerFoundry, Online — User Interface Design Certification, 2021 - 2022**

- Improved user interface design skills and user experience design and front-end development skills.

### **The University of Texas at Arlington, Arlington, TX — Bachelor's Degree in Exercise Science, 2015-2018**

### **Brookhaven College, Farmers Branch, TX — Associate of Science Degree, 2012 - 2014**

## **EXPERIENCE**

### **Chiropractic Assistant & Receptionist, Healthcare Chiropractic & Rehabilitation Clinic; Carrollton, TX — 2019 - 2020**

- Became an interpreter for connecting a chiropractor with Korean patients, which increased Korean patient rates in the clinic.

- Gave patients high-quality customer service, and they were satisfied with my work; taught them stretching exercises, helped them how to use machines, and massaged patients' injured areas with an ultrasound machine.

- Sent reminder messages, left courtesy calls for current patients, and managed new patients which more than 50% of patients came back for a follow-up appointment.
