PROFILE

UI designer with a chiropractic assistant and receptionist background. Experienced in designing prototypes for design concepts and collaboration work as a team and skilled in building wireframes and user flows.

PROJECT

Elejewel App — Focused on User Interface Design

- Includes research through guiding principles and user flow in the last immersion project with UI elements such as logos, colors, fonts, and styling. The most completed work with remarkable low, mid, and high fidelity came out.

Portfolio Site — Made my website with HTML & CSS

- Knowledged how to relate UI design and front-end development coding

EDUCATION

CareerFoundry Online Bootcamp — User Interface Design Certification, 2021 - 2022

- Learned not only user interface design but also user experience design and front-end development from CareerFoundry

The University of Texas at Arlington, Arlington, TX — Bachelor's Degree in Exercise Science, 2015-2018

Brookhaven College, Farmers Branch, TX — Associate of Science Degree, 2012 - 2014

EXPERIENCE

Chiropractic Assistant & Receptionist, Healthcare Chiropractic & Rehabilitation Clinic; Carrollton, TX — 2019 - 2020

- Became an interpreter for connecting a chiropractor with Korean patients, which increased Korean patients rates

- Gave patients high-quality customer service: taught them stretching exercises, helped them how to use machines, and massaged patients' injured areas with an ultrasound machine

- Made appointments and courtesy calls, sent reminder messages, managed new patients, customer service, written auto accident patients' reports, billing requests, etc.
